

MET - 5000

Korean Vehicle Diagnostic / Service Scantool

MET-5000 is the ultimate service tool for Korean Vehicles. This fully functional service tool, is manufactured by Carnics, with the same capabilities as the genuine service tools for Daewoo, Kia, Hyundai, Ssangyong, & Samsung vehicles.

The MET-5000 combines all these genuine OEM service tools, together in the one single unit, with an additional two channel Labscope and multi-analyser functions as well!

The unit can diagnose all vehicle computer controlled systems, such as Engine, Transmission, ABS, Traction Control, SRS, Immobilisers, providing live data, fault code extraction, data record and playback, component activation, waveform storage, line & bar graph displays, and full component on-line specifications and diagnostic help information.

The unit allows all systems to be read, such as Engine, Transmission, ABS, SRS, Immobilisers etc. The unit also Supports "Live Data" and "Activation" of system components to check operation integrity.

A full on-line help menu system is built in with full fault code explanations, individual component libraries, and guides to assist the operator in fault identification and rectification. Snapshot functions are fully supported for all systems during road testing for intermittently occurring faults.

The high quality Labscope, has either general scope or special scope functions. In special scope mode, the operator can select the exact sensor required for testing, and the MET-5000, displays the selected signal and also a reference waveform for comparison. The unit also has the facility for Multi-meter tests of frequency, duty cycle ratio and voltage measurements. The MET-5000 offers the Korean Vehicle technician a complete system-testing unit in one package.

Unlimited Business Potential! Do you want to become a Korean Vehicle specialist, in the fastest vehicle growth sector in Australia? Call us today, and start taking your share of this unique business opportunity!

OB91 DATASCAN

MERCEDES BENZ * BMW * VOLKSWAGEN * AUDI * SEAT * VOLVO * NISSAN * MITSUBISHI * TOYOTA * OBD-II

OB91 Datascan Tool allows you to access on-board diagnostic information like never before! Simple, and easy to use, the OB91 is possibly the world's most expandable data scanner for professional service technicians, with on going software development, via upgradeable memory cartridges.

- Read & Clear Fault Codes
- Access Control Unit ID
- Component Activation
- Display live data graphs
- Program control units
- Display Live Data Stream
- ECU Coding
- Adaptation
- Reset service intervals
- Perform Cylinder inhibiting - Power Balance

* (Functions listed depend on vehicle & model type)

ENGINE-TRANSMISSION-SRS AIRBAG-ABS-TRACTION CONTROL CRUISE CONTROL-INSTRUMENT CLUSTER-LEVELING SYSTEMS-CLIMATE CONTROL

And Much Much More !
